## Examples of Work

---

Bellow are some examples of Assignments completed and submitted by myself to meet graduation requirements .

\* A simple calendar application that allows a user to save events for each hour of the work day.

- <https://spental.github.io/DayPlanner/>

\* The concept for Let's Plan A Day App is to help users connect to random events and locations based off user's zip code, Users can refresh results until satisfied. Users can email event/restaurant details to specified recipient.

- <https://spental.github.io/SpencersDateApp/>

\* The Weather Dashboard Application was designed to give the user a simple easy to use weather app for desktop or mobile devices. Weather Dashboard Application allows users to select City of Interest by entering a 5 digit zip-code. The Application will pull API data such as temperature, humidity, wind speed,uv index,a and current date and time.
